

Chlamydia Evaluation Initiative

IPP Puerto Rico
Region II Meeting
November 10, 2009

Estimate Coverage

$$\frac{\# \text{ of CT tests on women } < 26}{\text{target population women } < 26} = \text{\% Estimate coverage of CT screening}$$

Methodology, Data Sources, and Approach

- The methodology proposed will estimate the coverage for Chlamydia screening in the Fajardo region:
 - Identification of the eligible population
 - Data collection of screening services
 - Presentation of findings.

Implementation Plan

- Award for 4 month of work
- External contract
- Data colaboration

Thanks
